Projects

Online Learning Platform | *Java, Android Studio, Firebase*

- * Developed an Android e-learning platform using Java, Android Studio, and Firebase.
- * Centralized learning resources for diploma students, including reference books, video lectures, and MSBTE question papers.
- * Dynamic content management system allows admin to add, update, or delete materials
- * Data changes are instantly synchronized across all connected clients. When a new resource is added or updated, students see it immediately.

Covid Insecure Distance Detector

- * Developed An IoT based Prototype to keep track of the social distance in shops.
- * Prototype consists of Gear Motor, Light Sensors, NodeMCU, etc.

Portfolio | *HTML, CSS*

- * Employing HTML and CSS, the portfolio project demonstrates adeptness in crafting elegant, responsive designs tailored to user experience standards.

Technical Skills

Languages: C, C++, Java, HTML/CSS, MySQL, MongoDB, Node.js, PHP, JavaScript
